

SAP System conversion to SAP HANA

Transition to SAP HANA faster and better

The countdown has begun

SAP is requiring all its customers to migrate to the SAP HANA® by 2025. The clock is ticking for 80% of SAP's customers who have not yet made this move.

Not an easy choice

Moving to SAP HANA® requires SAP customers to take many hard decisions to come up with a migration path that works for them now and is also future-proof.

When choosing to migrate to SAP HANA, the SAP customers need to answer some key questions such as – Should we move to SoH or S/4HANA? Is it going to be a greenfield, brownfield or hybrid migration? Cloud vs. On-prem?

Should we use HANA appliance or TDI? Should we archive data prior to migration? What impact is it going to have on the existing business processes and the custom code we have written?

The migration process itself is very complex, long, and challenging for customers to do it alone.

PrideVel can help SAP customers navigate through the decision making. PrideVel can help its SAP customer navigate through the complexity and create a path to successful SAP HANA adoption through its proven assessment, design, build, migrate, and run-and-manage services.

Meeting your SAP HANA needs

PrideVel offers an SAP HANA solution to fit the IT strategy of your organization.

- Data Center — HANA Appliances, and TDI
- Deployment — On-premises, Hybrid IT, and Cloud
- SAP HANA landscapes consolidation
- SAP HANA Sizing – Sizing based on current and future utilization, archival of data

End-to-end migration services

PrideVel using its proven models offers you help at every stage of SAP HANA migration project – from Discovery to Go-Live

- Discovery – Evaluating new SAP HANA technology and map it to

existing business process to build a roadmap to derive current and future business benefits

- Readiness Assessment – SAP HANA assessment to identify impact on existing business processes, modification to existing SAP ERP, and custom development
- IT Architecture – Design and blue-print the right hardware architecture to meet current and future needs
- Solution – Help choose between on-prem vs cloud and HANA appliance vs TDI
- Migrate – Plan and execute migration using accelerators, and proven methodologies
- Testing – Test management and test execution services to ensure the SAP HANA productive system functions as expected
- Training – Train end users to effectively use and IT staff to efficiently manage the SAP HANA systems
- Go-Live and hyper care – Go live on SAP HANA and provide hyper care support
- Optimization – Optimize solution to leverage benefits of SAP HANA
- Maintenance – Provide on-going maintenance support

SAP HANA TDI Service

TDI Edition - Apart from SAP HANA "all-in-one" appliance box, SAP also offers an additional delivery approach for SAP HANA - SAP HANA tailored data center integration. HANA TDI provides customers with more flexibility and choices for HANA hardware infrastructure.

With HANA TDI, customers can choose their preferred hardware vendors and infrastructure. HANA TDI can significantly lower the costs and allow for easier integration of SAP HANA into customers' data center.

PrideVel along with its partner Cisco support for TDI. Depending on your needs, you can choose from the following TDI support solutions,

- Total build and validate support
- Safe passage support
- Angel support

Auto Remediation of Custom Code

SAP HANA requires several changes in your custom code for it to run successfully on SAP HANA after the migration. Custom code remediation for SAP HANA is a major task typically amounting to several person years of manual labor.

PrideVel uses Gekkobrain - Custom Code Assessment and Auto Remediation tool to assess and remediate the code. The tool has generated great returns on investment for our customers by successfully reducing remediation cost by over 80%.

Whether you are migrating to SoH or directly to S/4HANA, Gekkobrain works for both options.

PrideVel is the master distributor for Gekkobrain in North America.

About PrideVel

PrideVel is an SAP Services Partner providing SAP implementation and support services to SAP customers across all industries.
